

[The Global Warming Scam](#)Select Language :

Last modified: 04 Apr 2011

Election for BCSS Chairman at AGM on 9th April
Tony Mace asks you to vote and preferably for Suzanne Mace
Postal ballots to be returned by 7th April

The cactus and succulent plant mall (CSPM) is an Internet resource for all growers of cacti and succulent plants. It is regularly updated with information on cactus and succulent societies and suppliers of plants, seeds and literature on cacti and succulents. The CSPM has developed and hosts webpages for cactus and succulent organisations worldwide (227 domains + 55 web sites within cactus-mall.com + 120 advertisers). It also aims to maintain as complete a list of web pages and other cactus and succulent related Internet facilities as possible. The CSPM is maintained by Suzanne and Tony Mace. We regret that our work load has grown to the point where we can no longer answer individual cultivation or identification questions. We recommend you ask these in the [British Cactus Society Forum](#).

The CSPM includes the official webpages for a number of the [national](#) Cactus and Succulent Societies, websites for many [specialist](#) groups, [local clubs](#) and [nurseries](#) all over the world. On these pages you can find information about their publications, local groups and other activities. If you want your page indexed on the CSPM please [give us the details](#). If you know of a link which is not in our current lists we will be very pleased if you can tell us about it. If you are responsible for any of the resources listed on our site and change the address please let us know. If you find any links not working please alert us.

Before requesting plant or seed lists **PLEASE READ** the notes on our [nursery](#) page. Many cacti and succulents are CITES listed plants and cannot be mailed internationally without licences and extensive official documentation which few organisations are willing or able to supply. Please also note that **CACTUS-MALL.COM** is a web hosting company **NOT a Nursery**. We have a dedicated high performance server which currently hosts **227** domains including **216** related to cacti and succulents. This portal attracts more than 100,000 visitors per month and the server more than 600,000 so this is the place to [host your webpages](#) or [advertise](#) if you want to maximise your traffic. We invite you to join us. Some of the hosted domains:
